SCOTTIE RESOURCES CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months period ended November 30, 2021 and 2020

(Expressed in Canadian dollars)

1 NATURE OF OPERATIONS

Scottie Resources Corp. (“Scottie” or the “Company”) is a publicly traded company incorporated on November 24, 2009 under the laws of the Province of British Columbia, Canada. The Company’s shares are listed on the TSX Venture Exchange (“TSX-V”) under the symbol SCOT.

The Company’s corporate registered and records office is located at #905 – 1111 West Hastings Street, Vancouver, British Columbia, V6E 2J3. The Company is engaged in the identification, acquisition, exploration, and development of mineral properties in British Columbia, Canada. The Company has not placed any of its mineral properties into production and is therefore considered to be in the exploration stage. These condensed consolidated interim financial statements for the Company for the three months ended November 30, 2021 are comprised of the results of the Company and its subsidiary.

The Company is in the process of exploring its mineral properties and has not yet determined whether any of its properties contain mineral reserves that are economically recoverable. The recoverability of the amounts spent for mineral properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposition of the properties.

These condensed consolidated interim financial statements are prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. The Company’s ability to continue on a going concern basis beyond the next twelve months depends on its ability to successfully raise additional financing for the substantial capital expenditures required to achieve planned principal operations. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. The Company has not generated any revenues since inception and has a history of losses and accumulated deficit of \$21,018,665 as at November 30, 2021. These factors form a material uncertainty that may raise significant doubt regarding the Company’s ability to continue as a going concern. These consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate, which could be material.

COVID-19 (the coronavirus) has threatened a slowdown in the global economy as well as caused volatility in the global financial markets. The extent to which COVID-19 may impact the Company’s business will depend on future developments such as the geographic spread of the disease, the duration of the outbreak, travel restrictions and social distancing, business closures or business disruptions, and the effectiveness of actions taken in Canada, the United States and other countries to contain and treat the virus. Although it is not possible to reliably estimate the length or severity of these developments and their financial impact to the date of approval of these condensed consolidated interim financial statements, these conditions could have a significant adverse impact on the Company's financial position and results of operations for future periods. To date, COVID-19 has had no significant impact on the Company’s business or operations.

SCOTTIE RESOURCES CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months period ended November 30, 2021 and 2020

(Expressed in Canadian dollars)

2. BASIS OF PREPARATION

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and the Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). The policies applied in these condensed consolidated interim financial statements are based on the IFRS issued and outstanding as at November 30, 2021.

Basis of measurement

These condensed consolidated interim financial statements have been prepared using the historical cost basis, except for certain financial instruments that are measured at fair value, using the accrual basis of accounting, except for cash flow information.

Functional and presentation currency

The presentation currency of the Company is the Canadian dollar.

Items included in the financial statements of each entity in the Company are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”), which has been determined for each entity within the Company using an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*. The functional currency of Scottie, the parent company, and its Canadian subsidiary, AUX Resources Limited, is the Canadian dollar.

Use of estimates and judgments

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

a) **Critical Accounting Estimates**

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial year and include, but are not limited to, the following:

Share-based compensation and valuation of warrants

The fair value pricing of stock options and warrants issued are subject to the limitations of the Black-Scholes Option-Pricing Model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes Option-Pricing Model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

2. BASIS OF PREPARATION (Cont'd...)

b) Critical Accounting Judgments

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements include, but are not limited to, the following:

Going concern presentation

Management has determined that the going concern presentation of the consolidated financial statements, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due as discussed in Note 1, is appropriate.

Non-monetary transactions

All non-monetary transactions are measured at the fair value of the asset surrendered or the asset received, whichever is more reliable, unless the transactions lack commercial substance, or the fair value cannot be reliably established. The commercial substance requirement is met when the future cash flows are expected to change significantly due to the transaction.

When the fair value of a non-monetary transaction cannot be reliably measured, it is recorded at the carrying amount (after reduction, when appropriate, for impairment) of the asset given up and adjusted by the fair value of any monetary consideration received or given. When the asset received or the consideration given up is shares in an actively traded market, the market value of those shares on the date of the transaction will be considered fair value.

Acquisition of a business or assets

The determination of whether a corporate entity or set of assets acquired, and liabilities assumed, constitute a business may require the Company to make certain judgements, taking into account all facts and circumstances. A business is presumed to be an integrated set of activities and assets capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs, or economic benefits. The acquisition of AUX Resources Corporation (and its mineral properties) was determined to constitute an acquisition of assets (Note 7). The excess of consideration paid over monetary assets was allocated on a proportional basis to the mineral properties acquired, which constitutes management's determination of the relative importance of the properties to the Company.

Carrying value and the recoverability of mineral properties

Management has determined that Company-incurred exploration costs that have been capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geological and other technical information, scoping and feasibility studies, accessibility of facilities, and existing permits.

SCOTTIE RESOURCES CORP.**Notes to the Condensed Consolidated Interim Financial Statements****For the three months period ended November 30, 2021 and 2020***(Expressed in Canadian dollars)***3. FINANCIAL INSTRUMENT AND RISK MANAGEMENT****Categories of Financial Assets and Financial Liabilities**

Financial instruments are classified into one of the following categories: amortized cost; fair value through profit or loss (“FVTPL”); fair value through other comprehensive income (“FVOCI”).

The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	November 30, 2021		August 31, 2021	
Cash and cash equivalents	FVTPL	\$	3,820,466	\$	7,265,107
Amounts receivable	Amortized cost	\$	382,908	\$	234,221
Deposits	Amortized cost	\$	248,432	\$	103,500
Accounts payable	Amortized cost	\$	533,212	\$	600,462

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.

Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable, deposits, and accounts payable approximate their fair value due to their short-term nature. Cash and cash equivalents are recorded at fair value and calculated under the fair value hierarchy and measured using Level 1 inputs.

Risk Management

The Company’s risk exposures and the impact on the Company’s financial instruments are summarized as follows:

Credit Risk

Credit risk is the risk of potential loss to the Company if a counter-party to a financial instrument fails to meet its contractual obligations. The Company’s credit risk is primarily attributable to its liquid financial assets, including cash and amounts receivable. The Company limits the exposure to credit risk in its cash by only investing its cash with high-credit quality financial institutions.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk to the extent that its cash balances bear variable rates of interest. The interest rate risks on cash and on the Company’s obligations are not considered significant.

3. FINANCIAL INSTRUMENT AND RISK MANAGEMENT (Cont'd...)

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its short-term debt obligations. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they come due; all of the Company's accounts payable are current and due within 90 days of the balance sheet. As at November 30, 2021, the Company has cash and cash equivalents of \$3,820,466 to settle current liabilities of \$533,212.

SCOTTIE RESOURCES CORP.**Notes to the Condensed Consolidated Interim Financial Statements****For the three months period ended November 30, 2021 and 2020***(Expressed in Canadian dollars)***7. MINERAL PROPERTIES**

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. All of the Company's mineral interests are located near Stewart, British Columbia, Canada in the region known as the Golden Triangle. The properties have been acquired under various option and purchase agreements and by staking. Certain claims are subject to a net smelter returns ("NSR") royalty ranging from 1% to 3%.

The Company has investigated title to all of its mineral property interests and, to the best of its knowledge, title to all of its interests are in good standing.

Acquisition of AUX Resources Corporation

On July 16, 2021, the Company completed the acquisition of AUX Resources Corporation by way of a three-corner amalgamation under the provisions of the Business Corporations Act (British Columbia). As a result of the transaction, AUX Resources Corporation merged with a wholly-owned subsidiary of Scottie to become AUX Resources Limited ("AUX"), a wholly-owned subsidiary of the Company. The Company's shareholders retained majority ownership in the course of the transaction and therefore the Company was determined to be the acquirer of AUX. The transaction included the acquisition of all the mineral properties and mineral property options held by AUX, expanding and consolidating the Company's holdings in the Golden Triangle of British Columbia.

Consideration with a fair value of \$12,753,132 was issued in exchange for all of the issued and outstanding equity of AUX and is comprised of:

- 54,499,642 common shares of the Company at \$0.215 per share (\$11,717,422);
- 18,433,817 warrants of the Company with fair values between \$0.0209 and \$0.0451 per warrant (\$656,675) (Note 10d contains a summary of the assumptions used to calculate fair values); and
- 2,432,000 stock options of the Company with fair values between \$0.0896 and \$0.1938 per stock option (\$379,035) (Note 10c contains a summary of the assumptions used to calculate fair values)

Transaction costs of \$79,103 associated with the acquisition were recorded. The acquisition was accounted for as an asset acquisition because AUX did not meet the definition of a business. The net purchase price was allocated to the assets acquired and liabilities assumed as follows:

Cash	\$ 2,757,834
Amounts receivable	18,614
Prepaid expenses	225,138
Deposits	48,000
Mineral properties	9,922,969
Accounts payable and accrued liabilities	(102,546)

The consideration paid over the monetary assets acquired and liabilities assumed was attributed to the value of the mineral properties acquired from AUX, allocated on a proportional basis to individual mineral properties based on management's determination of the relative importance of the properties to the Company.

11. RELATED PARTY TRANSACTIONS (Cont'd...)

- b) Amounts owing to directors and officers and companies with directors and officers in common are disclosed in Note 8. All amounts are unsecured, with no specific terms of repayment.

12. SEGMENT DISCLOSURE

The Company has one reportable operating segment in Canada which operates in the acquisition, exploration and evaluation of mineral resources. All of the Company's non-current assets are located in Canada.

13. MANAGEMENT OF CAPITAL

The Company manages its common shares, stock options and warrants as capital (Note 10). The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue acquisition, exploration and evaluation of mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable level of risk.

The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets, or adjust the amount of cash.

To facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors including successful capital deployment and general industry conditions.

To maximize ongoing exploration expenditures, the Company does not pay dividends. The Company's investment policy is to keep its cash treasury on deposit in interest-bearing Canadian chartered bank accounts and short-term guaranteed investment certificates.

The Company estimates that it will require additional funding to carry out its exploration plans and operations through the next twelve months. The Company is not subject to any externally imposed capital restrictions. There were no changes to the Company's approach to capital management.
