# FORWARD LOOKING STATEMENTS

Forward-looking statements relate to future events or the anticipated performance of the Company and reflect management’s expectations or beliefs regarding such future events and anticipated performance. In certain cases, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “believes”, or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will be taken”, “occur” or “be achieved”, or the negative of these words or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual performance of the Company to be materially different from any anticipated performance expressed or implied by the forward-looking statements.

Important factors that could cause actual results to differ from these forward-looking statements include risks related to failure to define mineral resources, to convert estimated mineral resources to reserves, the grade and recovery of ore which is mined varying from estimates, future prices of gold and other commodities, capital and operating costs varying significantly from estimates, political risks arising from operating in certain jurisdictions, uncertainties relating to the availability and costs and availability of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, conclusions of economic evaluations, changes in project parameters as plans continue to be refined, uninsured risks and other risks involved in the mineral exploration and development industry.

Although the Company has attempted to identify important factors that could cause actual performance to differ materially from that described in forward-looking statements, there may be other factors that cause its performance not to be as anticipated. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date of this presentation and the Company does not intend, and does not assume any obligation, to update these forward-looking statements.

## † Qualified Persons

Thomas Mumford, Ph.D., P.Geo., Scottie Resources Corp., is the Qualified Person as defined by National Instrument 43-101 (NI 43-101) for the Scottie Gold Project, and has reviewed and approved the data disclosed in this presentation, including sampling, analytical, and test data underlying the information disclosure.

# INVESTMENT HIGHLIGHTS

**CASH POSITION**  
**\$10.6 M CAD**

## LOCATED IN BC'S GOLDEN TRIANGLE

Prolific Tier 1  
mining jurisdiction

Favourable  
geologic position

7 Past-producing  
mines

## INFRASTRUCTURE & ACCESSIBILITY

40 km from Stewart,  
BC, and Portland Canal

4-season road access

Existing mining  
infrastructure

## ADVANCED EXPLORATION

6 km trend of  
high-grade discoveries

Deposits outcrop from  
surface to >500 m depth

Rapid expansion of brown  
& greenfield targets

## COMMANDING LAND POSITION

~58,500 ha in the  
Stewart Mining Camp

Properties adjacent to  
Ascot Resources and  
Newmont Mining

## EXPERIENCED MANAGEMENT TEAM

Independent board  
with track record  
of success

Deeply entrenched  
in the Golden Triangle  
and surrounding  
communities

# THE SCOTTIE GOLD MINE

Historic drilling was production focused  
Average hole length was only 75.2 m long

Mine produced 95,426 ounces of gold  
from 1981-1984  
Average recovered grade of 16.2 g/t gold

Operated with a 10 g/t gold cutoff

Mine Permit (M139) - Care and Maintenance

Released May 7, 2025

# DSO OPERATION

Using ore sorting technology, DSO will eliminate the need for a gold processing plant and tailings facility, significantly reducing both the capital required and the environmental footprint.

## STRATEGY

Commence open pit mining, reducing capital costs as well as start-up and operational risk

## TIMING

Structural supply deficit in the Asian copper smelter market allows for extremely low treatment charges for the foreseeable future

## PERMITS

Existing mine permit (M139) currently in place, providing pathway to near term production

## POSITION

Located 40 km from a deep-sea shipping terminal in one of the lowest-cost commercial shipping lanes between North America and Asia

PREMIER MILL

## PRELIMINARY ECONOMIC ASSESSMENT

# SCOTTIE GOLD MINE DSO MINE PLAN

Initial Capital Cost of \$128.6 M CAD

- Camp set back from mining activities
- Integrated shop / warehouse and LNG powerplant
- Crushing and sorting plant (pictured below)
- Covered stockpiles of sorted ore and fines
- Waste rock storage facility
- SGM avalanche shelter

## PRELIMINARY ECONOMIC ASSESSMENT

# BLUEBERRY MINE PLAN

Mine payback 1.2 years (US\$2600 DSO model)

Open pit grade 7.71 g/t gold (79,400 oz)

- De-risks project with rapid project payback

Underground grade 6.91 g/t gold (315,800 oz)

Contract mining for both open pit and underground

## PRELIMINARY ECONOMIC ASSESSMENT

# SCOTTIE GOLD MINE PLAN

Underground grade 6.07 g/t gold (87,800 oz)

Detailed surveying of existing workings required

- May help with sterilization of adjacent stopes
- Planned for 2026

Planned as all new development

- Opportunity for rehab of old workings

PRELIMINARY ECONOMIC ASSESSMENT
